

PEDIATRIC AND ADOLESCENT PROGRAM OUTCOMES

STRIVING FOR EXCELLENCE

Mary Free Bed at Covenant gathers information on results achieved by patients served in its programs. These results are offered so you can see what others have accomplished during their inpatient stay.

We always learn from our patients about how to improve on excellent care, each and every time, no exceptions!

PERSONS SERVED

NUMBER OF PERSONS SERVED: **1** AGE: **17**

DISCHARGE TO HOME/COMMUNITY

At Mary Free Bed at Covenant, more pediatric patients receiving inpatient rehabilitation were discharged to live in the community compared to the nation.

The length of stay was 23 days.

FUNCTIONAL IMPROVEMENT

Using the QRP Scale

The level of functional improvement of patients in rehabilitation is measured in points gained from admission to discharge for a variety of skills and abilities used in daily life. This is reported to the Centers for Medicare and Medicaid (CMS) through the Quality Reporting Program (QRP), which enables us to compare the functional improvement of Mary Free Bed at Covenant patients to other rehabilitation patients across the nation.

Mary Free Bed at Covenant patients achieved more functional improvement than the national average as measured through QRP.

QRP FUNCTIONAL CATEGORIES

Self Care	<ul style="list-style-type: none"> Eating Oral Hygiene Toilet Hygiene Shower/Bathe Self Dressing
Mobility	<ul style="list-style-type: none"> Moving in bed Transferring to and from bed, chair, toilet and car Ambulation (walking) and/or wheelchair mobility Stairs

PEDIATRIC AND ADOLESCENT PROGRAM OUTCOMES

AVERAGE NUMBER OF THERAPY HOURS

During FY2020, this patient participated in an average of three hours of daily therapy over a five-day therapy week. This includes time spent in physical therapy, occupational therapy and speech therapy.

Additionally, and as needed, our patients may receive psychology services, orthotics and prosthetics, respiratory therapy, recreational therapy, registered dietitian services and attend education and peer support meetings.

UNPLANNED TRANSFERS FOR ACUTE CARE¹

Under certain circumstances, a patient may demonstrate changes in his or her medical condition that warrant a transfer to acute care for close medical monitoring. If this occurs, patients are transferred to acute-care services and typically return to the inpatient rehabilitation program within a few days. During FY2020, the frequency of these transfers for patients at Mary Free Bed at Covenant was 0%.

PATIENT SATISFACTION

In our most recent FY2020 patient satisfaction survey data for all inpatients, Mary Free Bed at Covenant achieved a Likely to Recommend rank and overall satisfaction rate of 100%.

Source: Internally Generated Survey

FOLLOW UP²

After discharge, patients receive a 30-day follow-up call to find out how those served are functioning following the inpatient rehabilitation stay.

100%

Physical Ability

In this survey, our patient stated their physical abilities had improved to the time of discharge.

100%

Health Status

The survey also showed that our pediatric patient had improved or maintained their health status since discharge.

CARF Accredited as an Inpatient Rehabilitation Hospital-Adults.

Accredited by Healthcare Facilities Accreditation Program.
