

STROKE PROGRAM OUTCOMES

STRIVING FOR EXCELLENCE

Mary Free Bed at Covenant gathers information on results achieved by patients served in its programs. These results are offered so you can see what others have accomplished during their inpatient stay.

We always learn from our patients about how to improve on excellent care, each and every time, no exceptions!

PERSONS SERVED

NUMBER OF PERSONS SERVED: **234**

Age	MFB@C	Nation
Avg. Age	70	69

Our average length of stay was 16 days compared to the national average of 17 days.

DISCHARGE TO HOME/COMMUNITY

The Mary Free Bed at Covenant rate for discharge to community is better than the national average for adult stroke patients receiving inpatient rehabilitation.

FUNCTIONAL IMPROVEMENT

Using the QRP Scale

The level of functional improvement of patients in rehabilitation is measured in points gained from admission to discharge for a variety of skills and abilities used in daily life. This is reported to the Centers for Medicare and Medicaid (CMS) through the Quality Reporting Program (QRP), which enables us to compare the functional improvement of Mary Free Bed at Covenant patients to other rehabilitation patients across the nation.

Mary Free Bed at Covenant patients achieved better functional gain than the national average as measured through QRP.

QRP FUNCTIONAL CATEGORIES

Self Care	<ul style="list-style-type: none"> Eating Oral Hygiene Toilet Hygiene Shower/Bathe Self Dressing
Mobility	<ul style="list-style-type: none"> Moving in bed Transferring to and from bed, chair, toilet and car Ambulation (walking) and/or wheelchair mobility Stairs

STROKE PROGRAM OUTCOMES

AVERAGE NUMBER OF THERAPY HOURS

The average number of therapy hours per day for all adult inpatients who have experienced stroke includes time spent in physical therapy, occupational therapy and speech therapy. During FY2023, patients participated in an average of three hours of daily therapy over a five-day therapy week.

Additionally, and as needed, our patients receive psychology services, orthotics and prosthetics, respiratory therapy, recreational therapy, registered dietitian services and attend educational and peer support meetings.

UNPLANNED TRANSFERS FOR ACUTE CARE

Under certain circumstances, a patient may demonstrate changes in his or her medical condition that warrant a transfer to acute care for close medical monitoring. If this occurs, patients are transferred to acute-care services and typically return to the inpatient rehabilitation program within a few days. During FY2023, the frequency of these transfers for patients who have experienced stroke at Mary Free Bed at Covenant was 7.26%, compared to the national average of 11.53%.

PATIENT SATISFACTION

In our most recent FY2023 patient satisfaction survey data for all inpatients, Mary Free Bed at Covenant achieved an overall satisfaction score of 92.5%.

92.5%
